

BLOCKCURTAIN EW60

BLOCURTAIN EW60 is tested to withstand fire and guarantee the integrity at 1000°C for 120 minutes (E performance) and contain the heat radiation for 60 minutes (W performance).

BLOCKCURTAIN EW60, guarantee the curtain integrity and the resistance to the hot gasses, tested at 1000 °C for 120 minutes. (E performance)

BLOCKCURTAIN EW60 is a mobile and partially flexible fire curtain, realized in one module (no overlaps), normally wrapped and supplied inside an **head box** made in galvanized steel 1,2 mm thick with the dimensions of
W. 220 x 220 H. mm

The **fabric** is made of fiber glass reinforced with steel cables, covered on both sides with polyurethane powder and has a weight of 1120 g/mq

A bottom bar with counterweight 50 mm width, helps the curtain to be held in tension once in fire position (open); the weight is calculated proportionally to the curtain's dimensions. The bottom bar is coated RAL 9010 (standard supply).

The lateral side guides are made of galvanized steel, 2,00 mm thick, have a standard dimensions of 120 x 70 mm inside the side guides there is a the retention tube where the fabric is hooked for the whole height

BLOCKCURTAIN EW60 is normally supplied with an internal tubular drive 24V, inserted on the winding shaft and guarantee linearity and a compact aesthetics and functionality.

Once the curtain receive the fire alarm or in case of power failure the curtain thanks to the Gravity fail safe system descend with a controlled speed.

The control panel, always supplied, can control multiple modules and has an integrated Ups battery in case of main power failure.

Frontwall and upper fixation on masonry with screws and steel anchors

On request: coating with RAL colors of side guides, and of a different color than RAL 9010 of the counterweight element

BLOCKCURTAIN EW60 is **CE MARKED** in according to
EN 16034:2014, EN 13241:2003 + A2:2016
